ODO KINGSLEY UCHENNA

CLOUD & DEVOPS ENGINEER

09135025695 | odokingsleyu@gmail.com | Portfolio | LinkedIn | GitHub | medium.com/@RealKingHubs

PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with a few years of experience designing and automating secure, scalable infrastructure across AWS and Azure using Terraform, Ansible, Docker, Kubernetes, and modern monitoring platforms. Delivered high-impact automation solutions, including an Azure Container Registry cleanup pipeline that eliminated manual maintenance and a GitHub Actions CI/CD workflow that reduced Drupal deployment times from hours to under ten minutes, improving delivery speed and reliability for cloud-native applications.

TECHNICAL SKILLS

Cloud: AWS	EC2, Amazon ECS Fargate, EKS, VPC, S3, IAM, RDS, DynamoDB, Application Load Balancer, Auto Scaling
Cloud: Azure	Azure Container Registry, Azure Application Insights, Azure Log Analytics, Azure App Service
Architecture & Reliability	Cloud Architecture, High Availability, Scalability, Cloud Performance Tuning, Application Development, Web Services
IaC & Automation	Terraform, Ansible, Bicep, CloudFormation, Bash, PowerShell, Python, Scripting
Containers & Orchestration	Docker, Kubernetes, Amazon ECS Fargate
CI/CD & Version Control	GitHub Actions, Azure DevOps, GitLab CI, Git, GitHub
Monitoring & Logging	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Filebeat, Amazon CloudWatch
Security & Operations	Encryption, Network Security, Firewall, Compliance, Incident Response, Root Cause Analysis, Infrastructure Monitoring
OS & Virtualization	Linux (Ubuntu, CentOS), Windows Server, VMware, Virtualization
Networking	DNS, DHCP, IP, TCP/IP Tuning, HTTP/HTTPS, Load Balancing, Nginx, Apache, VPC Design, Security Groups
Databases	MySQL, Amazon RDS, PostgreSQL, MongoDB Atlas, DynamoDB
Professional Skills	Communication, Collaboration, Continuous Improvement, Continuous Learning, Attention to Detail, Analytical Thinking, Ownership, Fast-Paced Environments, Change Management, Documentation

PROFESSIONAL EXPERIENCE

Preferred Digital Business Solutions Aug 2026 – Present

DevOps Engineer

- Developed and automated Azure Container Registry (ACR) maintenance pipelines, removing container images older than 30 days while preserving the 10 most recent versions for rollback and recovery, reducing manual registry management effort.
- Designed and implemented an ACR image lock/unlock automation solution, protecting production container images from accidental deletion and ensuring safe retention of critical releases during automated cleanup operations.
- Supported and optimized CI/CD pipelines for Android, iOS, and web applications in Azure DevOps, resolving deployment, branch configuration, and Docker build issues and restoring reliable automated deployments across multiple environments.
- Resolved a critical Git history conflict between staging and main branches, preserving commit history and successfully unblocking release deployments, preventing disruption to the development and delivery process.
- Investigated and resolved Azure DevOps permission and deployment issues, improved access management processes, and implemented centralized access tracking, increasing visibility and governance across teams while maintaining secure, zero-downtime operations.

Bincom Dev Center May 2026 – Aug 2026

Cloud & DevOps Engineer Apprentice

- Eliminated the risk of exposed server credentials by configuring AWS Systems Manager (SSM) for administration with no open SSH ports.
- Reduced Drupal deployment times from hours to under three minutes with a GitHub Actions CI/CD pipeline using OIDC authentication.
- Standardized configuration with Ansible playbooks and cut server setup from hours to under two minutes via Docker Compose and Ansible.
- Secured Amazon RDS in private subnets with security groups; configured Amazon EFS shared storage to prevent asset inconsistency.
- Centralized logs via ELK over secure SSM tunnels to reduce troubleshooting time; supported AWS production with Bash, VPC design, automation, and Grafana.

PROJECTS

- Built and automated a production-grade AWS cloud platform using Terraform across multiple Availability Zones, implementing secure networking, remote state management, and least-privilege access controls to improve infrastructure reliability, scalability, and security.
- Designed and deployed a fully automated CI/CD pipeline using GitHub Actions, Docker, and Amazon ECS Fargate, reducing deployment time, eliminating manual release processes, and strengthening security through OIDC-based authentication.
- Implemented a centralized monitoring, logging, and operations platform using AWS Systems Manager, Prometheus, Grafana, and the ELK Stack, improving system visibility, accelerating issue detection and troubleshooting, and reducing operational overhead across distributed workloads.

EDUCATION

AltSchool Africa: Diploma, Cloud Engineering Jul 2026

CERTIFICATIONS

Cloud Engineering Diploma Certificate: AltSchool Africa (Credential Ref: ZgGwNRpy0bafmhKhx2) Jul 2026

IT Infrastructure & DevOps Program: Bincom Academy (Certificate No: BA/2026/INFRA/0007) Jun 2026

Cloud and DevOps with AI Bootcamp: ExLearn Technologies (Credential ID: CDB00011295) Sep 2026

Front-End Software Engineering Certificate: Skyscanner Forage 2026

AWARDS & ACHIEVEMENTS

- **Best Graduating Learner Award: AltSchool Africa | Jul 2026.** Highest overall score, Karatu Class of 2026. Certificate awarded.
- **Best Learner Award: AltSchool Africa | Jul 2026.** Outstanding academic performance in Cloud Engineering. Certificate awarded.
- **Perfect Academic Evaluation Score.** 100/100 across all second and third semester Cloud Engineering evaluations at AltSchool Africa.
